

# AMAZON WEB SERVICES (AWS) WEBINAR

## FACE DETECTION APP

**Name:** S.Roshini

**E-mail:** roshinisundar12@gmail.com

**AWS:**

The image shows two screenshots of the AWS web interface. The top screenshot is the AWS Sign-in page, and the bottom screenshot is the AWS Management Console.

**AWS Sign-in Page:**

- Header: Amazon Web Services Sign-In
- URL: [signin.aws.amazon.com/signin?redirect\\_uri=https%3A%2F%2Fconsole.aws.amazon.com%2Fconsole%2Fhome%3Fnc2%3Dh\\_ct%26src%3Dheader-signin%26s...](https://signin.aws.amazon.com/signin?redirect_uri=https%3A%2F%2Fconsole.aws.amazon.com%2Fconsole%2Fhome%3Fnc2%3Dh_ct%26src%3Dheader-signin%26s...)
- Sign in options:
  - ☒ **Root user**  
Account owner that performs tasks requiring unrestricted access. [Learn more](#)
  - ☐ **IAM user**  
User within an account that performs daily tasks. [Learn more](#)
- Root user email address:
- Buttons: **Next**, [New to AWS?](#), [Create a new AWS account](#)
- Advertisement: **Aurora PostgreSQL Global Database Now Available**  
Create a database that spans multiple AWS regions and replicates your data with no impact on performance.

**AWS Management Console:**

- Header: EC2 Management Console
- URL: [us-east-2.console.aws.amazon.com/ec2/v2/home?region=us-east-2#Home](https://us-east-2.console.aws.amazon.com/ec2/v2/home?region=us-east-2#Home)
- Navigation: Services, Resource Groups, Support
- Left sidebar: **EC2 Dashboard** (New), Events (New), Tags, Reports, Limits, **INSTANCES** (Instances, Instance Types, Launch Templates (New), Spot Requests, Savings Plans, Reserved Instances, Dedicated Hosts (New), Capacity Reservations), **IMAGES** (AMIs)
- Main content area:
  - Welcome to the new EC2 console!**  
We're redesigning the EC2 console to make it easier to use and improve performance. We'll release new screens periodically. We encourage you to try them and let us know where we can make improvements. To switch between the old console and the new console, use the New EC2 Experience toggle.
  - Resources**  
You are using the following Amazon EC2 resources in the US East (Ohio) Region:

Resource	Count
Running instances	0
Elastic IPs	0
Dedicated Hosts	0
Snapshots	0
Volumes	0
Load balancers	0
Key pairs	3
Security groups	4
Placement groups	0
  - Account attributes**
    - Supported platforms
      - VPC
    - Default VPC: vpc-6d6da706
    - Console experiments

1. Choose AMI

2. Choose Instance Type

3. Configure Instance

4. Add Storage

5. Add Tags

6. Configure Security Group

7. Review

### Step 1: Choose an Amazon Machine Image (AMI)

An AMI is a template that contains the software configuration (operating system, application server, and applications) required to launch your instance. You can select an AMI provided by AWS, our user community, or the AWS Marketplace, or you can select one of your own AMIs.

Search for an AMI by entering a search term e.g. "Windows"

Quick Start

My AMIs

AWS Marketplace

Community AMIs

☐ Free tier only

Amazon Linux

Free tier eligible

Amazon Linux 2 AMI (HVM), SSD Volume Type - ami-0e01ce4ee18447327 (64-bit x86) / ami-03201f374ab66a26e (64-bit Arm)

Amazon Linux 2 comes with five years support. It provides Linux kernel 4.14 tuned for optimal performance on Amazon EC2, systemd 219, GCC 7.3, Glibc 2.26, Binutils 2.29.1, and the latest software packages through extras.

Root device type: ebs Virtualization type: hvm ENA Enabled: Yes

64-bit (x86)

64-bit (Arm)

Select

Amazon Linux

Free tier eligible

Amazon Linux AMI 2018.03.0 (HVM), SSD Volume Type - ami-01b01bbd08f24c7a8

The Amazon Linux AMI is an EBS-backed, AWS-supported image. The default image includes AWS command line tools, Python, Ruby, Perl, and Java. The repositories include Docker, PHP, MySQL, PostgreSQL, and other packages.

Root device type: ebs Virtualization type: hvm ENA Enabled: Yes

7. Review

### Step 2: Choose an Instance Type

Amazon EC2 provides a wide selection of instance types optimized to fit different use cases. Instances are virtual servers that can run applications. They have varying combinations of CPU, memory, storage, and networking capacity, and give you the flexibility to choose the appropriate mix of resources for your applications. [Learn more](#) about instance types and how they can meet your computing needs.

Filter by: 

All instance types

Current generation

Show/Hide Columns

Currently selected: t2.micro (Variable ECUs, 1 vCPUs, 2.5 GHz, Intel Xeon Family, 1 GiB memory, EBS only)

Support

1. Choose AMI

2. Choose Instance Type

3. Configure Instance

4. Add Storage

5. Add Tags

6. Configure Security Group

7. Review

### Step 4: Add Storage

Your instance will be launched with the following storage device settings. You can attach additional EBS volumes and instance store volumes to your instance, or edit the settings of the root volume. You can also attach additional EBS volumes after launching an instance, but not instance store volumes. [Learn more](#) about storage options in Amazon EC2.

Volume Type	Device	Snapshot	Size (GiB)	Volume Type	IOPS	Throughput (MB/s)	Delete on Termination	Encryption
Root	/dev/xvda	snap-0f54692056aaa4c20	8	General Purpose SSD (gp2)	100 / 3000	N/A	<input checked="" type="checkbox"/>	Not Encrypt

Add New Volume

Free tier eligible customers can get up to 30 GB of EBS General Purpose (SSD) or Magnetic storage. [Learn more](#) about free usage tier eligibility and usage restrictions.

4. Add Storage

5. Add Tags

6. Configure Security Group

7. Review

### Step 6: Configure Security Group

A security group is a set of firewall rules that control the traffic for your instance. On this page, you can add rules to allow specific traffic to reach your instance. For example, if you want to set up a web server and allow Internet traffic to reach your instance, add rules that allow unrestricted access to the HTTP and HTTPS ports. You can create a new security group or select from an existing one below. [Learn more](#) about Amazon EC2 security groups.

**Assign a security group:** ☒ Create a new security group ☐ Select an existing security group

**Security group name:**

**Description:**

Type	Protocol	Port Range	Source	Description
SSH	TCP	22	Custom 0.0.0.0/0	e.g. SSH for Admin Desktop

Add Rule

Warning

Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

Amazon S3 > Create bucket

### Create bucket

**General configuration**

Bucket name:   
Bucket name must be unique and must not contain spaces or uppercase letters. [See rules for bucket naming](#)

Region:

**Bucket settings for Block Public Access**

Public access is granted to buckets and objects through access control lists (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to this bucket and its objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to this bucket or objects within, you can customize the individual settings below to suit your specific storage use cases. [Learn more](#)

The screenshot displays the AWS Management Console for the EC2 Instance State page. The instance 'ec2-user@ip-172-31-39-191' is in the 'running' state. The console displays the instance's details, including its Public DNS (IPV4) address 'ec2-18-220-175-33.us-east-2.compute.amazonaws.com' and its IPv4 Public IP '18.220.175.33'. The instance is located in the 'us-east-2c' Availability zone. A terminal window is open, showing the installation of Composer and the execution of 'php composer.phar require aws/aws-sdk-php'.

The screenshot shows the AWS Management Console interface. At the top, there's a navigation bar with the AWS logo, 'Services', 'Resource Groups', and a search icon. Below this is a 'New EC2 Experience' section with buttons for 'Launch Instance', 'Connect', and 'Actions'. The main area is the 'EC2 Dashboard', which has a sidebar on the left with links to 'Events', 'Tags', 'Reports', 'Limits', and 'INSTANCES'. The 'INSTANCES' section is expanded, showing 'Instances', 'Instance Types', 'Launch Templates', 'Spot Requests', 'Savings Plans', 'Reserved Instances', 'Dedicated Hosts', and 'Capacity Reservations'. The main content area displays a table of EC2 instances. One instance is visible, with a status of 'running'. A terminal window is overlaid on the console, showing the command 'curl -s https://getcomposer.org/installer | php' and its output, which indicates the successful installation of Composer version 1.10.1.

## EC2 & REKOGNITION:

The screenshot displays the AWS Management Console interface. The top navigation bar includes the AWS logo, 'Services', 'Resource Groups', and user information (Roshini S, Ohio, Support). The left sidebar shows the 'EC2 Dashboard' and various navigation links under the 'INSTANCES' section. The main content area is divided into two panes. The left pane shows a terminal window for an EC2 instance with the following commands and output:

```
ec2-user@ip-172-31-39-191:/var/www/html/face$ sudo vim index.php
[ec2-user@ip-172-31-39-191 face]$ sudo php index.php
Image upload done... Here is the URL: https://aws-webinar.s3.us-east-2.amazonaws.com/sample.jpgTotally there are 9 faces[ec2-user@ip-172-31-39-191 face]$
```

The right pane shows the 'Status Checks' and 'Public DNS (IPv4)' details for the instance. The 'Status Checks' table indicates that 2/2 checks are passing. The 'Public DNS (IPv4)' section shows the following information:

Public DNS (IPv4)	Public DNS (IPv4)
ec2-18-220-175-33.us-east-2.compute.amazonaws.com	ec2-18-220-175-33.us-east-2.compute.amazonaws.com
IPv4 Public IP	18.220.175.33
IPv6 IPs	-
Elastic IPs	-
Availability zone	us-east-2c

The bottom of the console shows the 'Feedback' and 'English (US)' links, along with the copyright notice: '© 2008 - 2020, Amazon Internet Services Private Ltd. or its affiliates. All rights reserved.' The taskbar at the bottom of the screen shows the Windows taskbar with various application icons and the system clock indicating 2:32 PM on 4/4/2020.
